

Convido a en Lucas

The screenshot shows the GitLab web interface for the project 'Judith / GitLab_Judith'. The top navigation bar includes tabs for Project, Activity, Pipelines, Registry, Issues (0), Merge Requests (0), Wiki, and Snippets. The 'Members' section is active, showing a search bar to add new users and a table of existing users with access to the project. The table lists two users: 'Lucas Pérez González' and 'Judith', both with 'Master' access. The 'Add to project' button is visible in the top right of the members section.

The screenshot shows a GitLab Merge Request (MR) for the project 'Lucas Pérez González / GitLab_Lucas'. The MR is titled 'gikdgjdrs' and is currently in a conflict state. The interface shows the 'Merge Request 11' opened 2 minutes ago by 'Judith'. The conflict is between the 'prueba' branch and the 'master' branch. The file 'nicolas.txt' is highlighted, showing a conflict between the 'HEAD/our changes' (a ver si funciona de una vez) and the 'origin/their changes' (ivfjbshubveu, nicolas nico). The interface includes buttons for 'Close', 'Edit', 'Inline', 'Side-by-side', 'Interactive mode', 'Edit inline', and 'View file @064aed8'. A commit message box is visible with the text 'Merge branch 'master' into 'prueba'' and a list of conflicts: '# Conflicts: # nicolas.txt'. A green button 'Commit conflict resolution' is at the bottom. On the right, there is a sidebar with 'Todo', 'Assignee', 'Milestone', '1 participant', 'Notifications', and a reference link.

Conflicte des de Git

```
JuuStudio@JuuStudio-PC MINGW32 ~ (master)
$ cd GitLab_Lucas/

JuuStudio@JuuStudio-PC MINGW32 ~/GitLab_Lucas (prueba)
$ echo "otra prueba" > nicolas.txt

JuuStudio@JuuStudio-PC MINGW32 ~/GitLab_Lucas (prueba)
$ git checkout master
error: Your local changes to the following files would be overwritten by checkout:
    nicolas.txt
Please commit your changes or stash them before you switch branches.
Aborting
